        }
    ]
}
```

Result Page

Method	FORM GET
API URL	api/result

Description: To get the winning result.

Sample of response data:

```
{
    "error":  200,
    "message": "Success",
    "data": [
        [
            {
                "uniqueId": 7,
                "username": "wong988",
                "total_winnings":  "12888.0000"
            }
        ]
    ]
}
```

Leaderboard

Method	FORM GET
API URL	api/leaderboard

Description: To get the top winner from the leaderboard.

Sample of response data:

```
{
    "error":  200,
    "message": "Success",
    "data": [
        [
            {
                "uniqueId": 7,
                "username": "wong988",
                "total_winnings":  "12888.0000"
            }
        ]
    ]
}
```

Claim Total Winning Amount

Method	FORM POST
API URL	api/withdrawal

Description: Withdraw/Claim API is call with auth token.

Sample of response data:

```
{
    "error":  200,
    "message": "Claim Successfully",
    "data": [
        [
            {
                "uniqueId": 7,
                "username": "wong988",
            }
        ]
    ]
}
```
